

FACILITIES

Designed and Constructed per LEED "Green Building Rating System" Certification Criteria

LEED Designs --

- are leading the transformation of the built environment
- are built as designed and perform as expected
- have lower operating costs and increased asset value
- are healthy and comfortable for their occupants
- reduce waste sent to landfills
- conserve energy and water
- reduce harmful greenhouse gas emissions
- qualify for tax rebates, zoning allowances, and other incentives in hundreds of cities
- demonstrate an owner's commitment to environmental stewardship and social responsibility

The LEED for Schools Rating System recognizes the unique nature of the design and construction of K-12 schools. Based on LEED for New Construction, it addresses issues such as classroom acoustics, master planning, mold prevention and more.
