To Whom It May Concern:

I am writing this letter to endorse the firm of Remington, Vernick and Beach (RVB). I have been a municipal administrator for 15 years; and during that time I have worked with many engineers and engineering firms. Without a doubt, RVB is one of the best.

The fast pace of local government requires an engineering firm that can identify problems, respond quickly and get the job done. In other words, a firm that acts as a fully-integrated part of the municipal team. RVB brings this quality to the job. When we assign work to our engineer, we know it will be done efficiently and timely. Of equal importance is reliability. We know we will get quality work with RVB every time. When bids come in, there are no surprises. We don't see a lot of change orders. Projects are managed well, so municipal staff does not have to. All of which saves time and money.

We are very pleased with RVB and we wholeheartedly recommend them to any local government seeking a municipal engineer.

Sincerely,

David R. Forrest
Municipal Administrator
